Business Plan for Traders

A definite set of rules to follow. If you don't follow them then the method will be contaminated.

Blueprint is the method that answers all your questions.

1. Order entry criteria
2. Profit exit criteria
3. Automatic stop criteria
4. What is the risk management for the method?
5. How and when to increase your position size.
6. How to set up your charts
7. Tools for the trade so you don't miss any of the signals.
8. Starting Balance \$2,500-\$500,000 it's all relative

Rules of the Trade

ONLY TRADE THE SUPER SIGNAL

The Super Signal is a merger of a **quad rotation** and an HPS Playbook trade setup

Trading Playbook

- Buy/Sell Divergences
- Coils
- 1-2-3 Channels
- Rising and Falling Wedges
- VWAP

- Quad Rotation - Divergence
- Quad Rotation – Coil
- Quad Rotation – Trend Line
- Quad Rotation - Vwap
- Coiled Divergence
- Buy/Sell Divergence
- Quad Rotation
- Channel Breakout Stochastic Rotation
- Oversold Stochastic Lower Channel Line Bounce.

Important First Step!!

Determine if there is a trending market.
Market trend will determine your exit strategy

Is Trading Gambling?

If you had a choice of games to play what would it be?

1. Roulette
2. BlackJack
3. Slots

Blackjack Card Counting - Hi-Lo System

What is 'Divergence'

When the price of an asset and an indicator, index or other related asset move in opposite directions. In technical analysis, traders make transaction decisions by identifying situations of divergence, where the price of a stock and a set of relevant indicators.

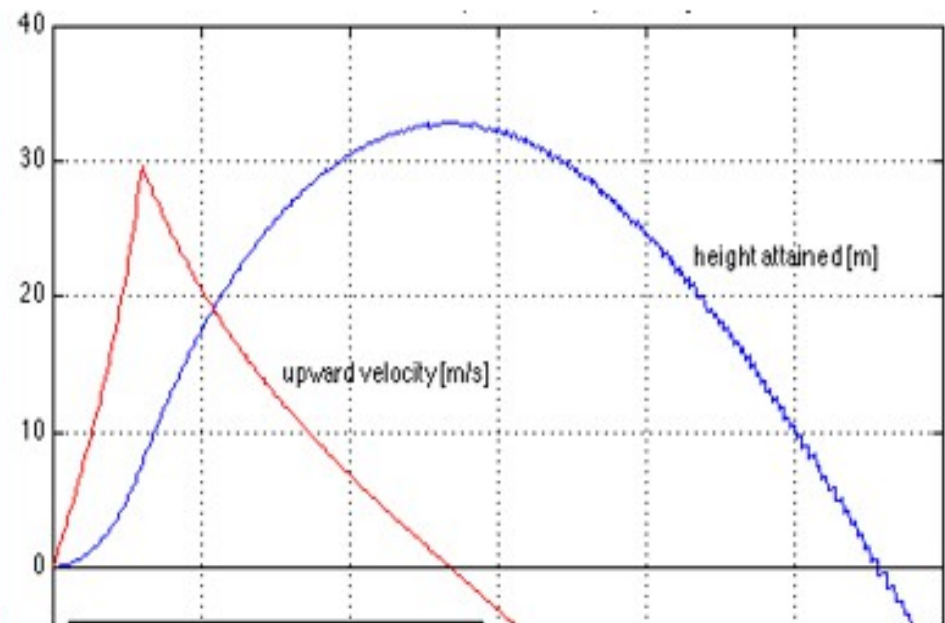

Developed by George C. Lane in the late 1950s, the Stochastic Oscillator is a momentum indicator that shows the location of the close relative to the high-low range over a set number of periods. According to an interview with Lane, the Stochastic Oscillator "doesn't follow price, it doesn't follow volume or anything like that. It follows the speed or the momentum of price. As a rule, the momentum changes direction before price."

Type 1 Bottom (Bullish)

George Lane was quoted about his stochastic indicator by saying "Stochastics measure the momentum of price. If you visualize a rocket going up into the air, before it can turn down, it must slow down. Momentum always changes direction before price."

Classic Lane Divergence

Buy Side Divergence Lower Low Entry

Stage 1 on the divergence should have the stochastics under the 20 Line.

That low should bounce bring the stochastics back above 20

For the divergence to set up you want to see a pretty quick move with the price back lower then the previous low or at minimum a double bottom.

Stage 2 At the same time the stochastic hold above the 20 line. And then turn up putting in a higher low on the stochastics.

Optional but recommended criteria

5 Min and/or 60 Min stochastics should be moving up (preferred) off oversold.

The lower low should be capped with a reversal candle.

Divergence signals are best when lined up with lower channel lines (trend line)

Stage 1 on the divergence should have the stochastics under the 20.

Stage 2 you want to see a pretty quick move with the price back lower then the previous low or at minimum a double bottom.

At the same time the stochastic hold above the 20 line. And then turn up putting in a higher low on the stochastics

ANATOMY OF A HPS TRADE

QUAD DIVERGENCE AKA Holy Grail

BUY SIGNAL- ENTER STOCK WHEN

Price has pullback in an organized fashion. Typically inside a channel

1st Stage: All 4 Stochastic Bands drop under the 20 line on first stage

2nd Stage: Price bounces along with the 9-3 Stochastic Band, then price quickly trades lower then the first stage price

As the price drops equal or lower then the 1st stage price the 9-3 stochastic turns up above the 20 line. Higher than the 1st stage stochastic low

Take trade with a visual confirmation of a turn back up of the 9-3 stochastic up activating the divergence signal

Place Stop 1-2 ticks under the pattern low candle

You want to take entry inside the channel and take profits outside channel. First profits are taken on the first 9-3 rotation back above 80, follow the remainder with a trailing stop

ANATOMY OF A HPS TRADE

20/20 Bull Flag

Important Info: The 60-10 is the key. The higher that number the stronger the trend.

Criteria for Setup

Bull Flag Buy Setup

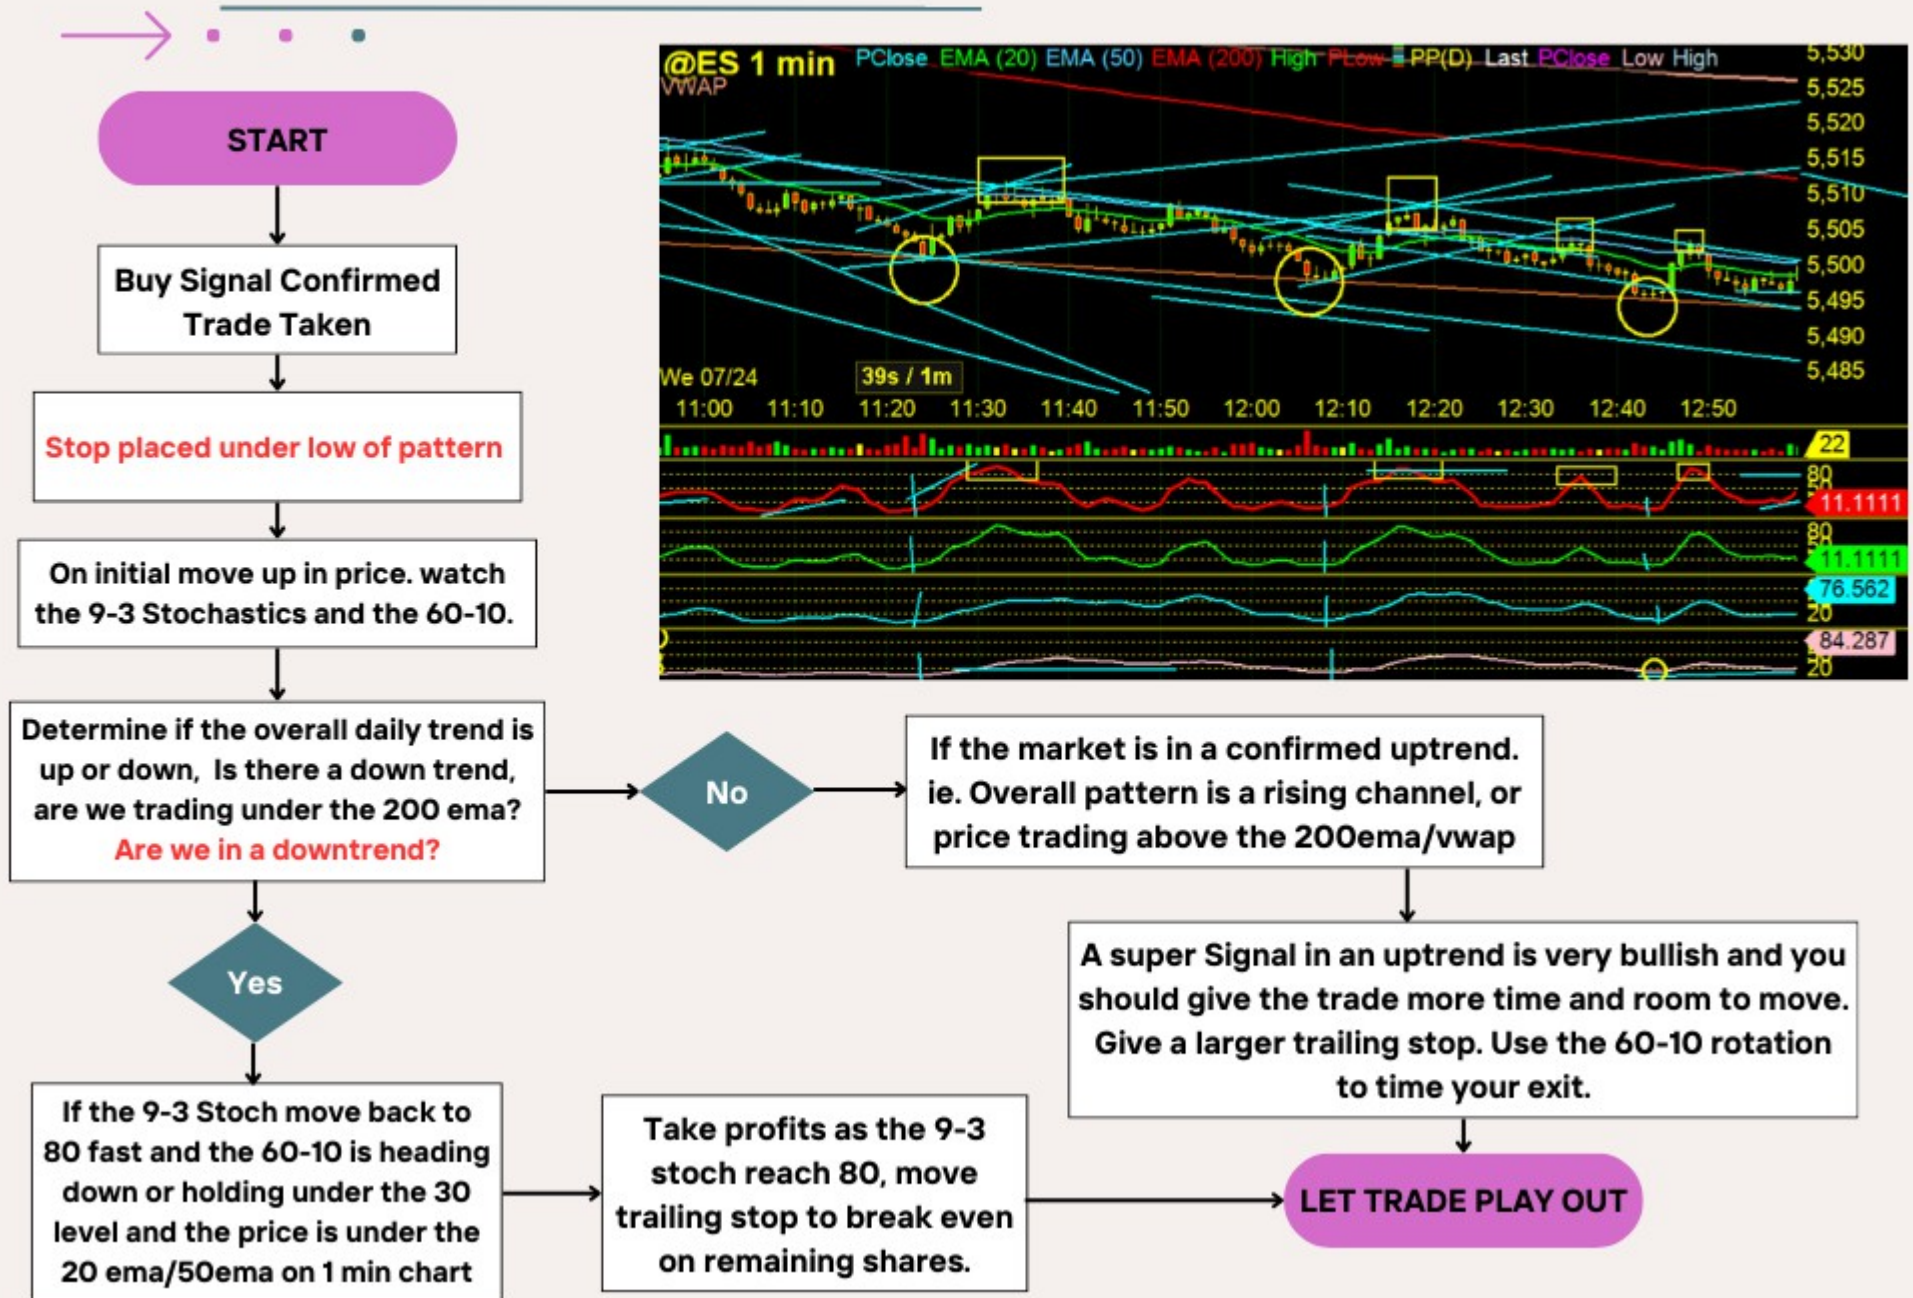

- 1) Slow stochastic oscillator is holding above 80
- 2) The medium stochastic oscillator is holding about 80 Strong <80> Weaker
- 3) The fast stochastic oscillator rotates quickly back down to 20
- 4) The price is holding on or above the 20 ema (exponential)
- 5) Go long as you get close of touch oversold 20 line on the fast stochastic rotation
- 6) Take partial profits as the fast stochastic oscillator crosses back above 80 and move stop to break even on any additional shares.

Bear Flag Short Setup

- 1) Slow stochastic oscillator is holding under 20
- 2) The medium stochastic oscillator is holding under 20 Strong >20< Weaker
- 3) The fast stochastic oscillator rotates quickly back up to 80
- 4) The price is holding on or below the 20 ema (exponential)
- 5) Go long as you get close of touch overbought 80 line on the fast stochastic rotation
- 6) Take partial profits as the fast stochastic oscillator crosses back below 20 and move stop to break even on any additional shares.

Risk Management: How to Determine Stop Loss

As the Method is solely based on divergences the stop will automatically be placed after the trade entry and placed 1 tick under the divergence candle in the case of a long and 1 tick above the divergence candle in case of a short.

Most of the great setups appear in channels

The Steeper the divergence the better the reward.
In a downtrend where 20-10 is under 20 take profits
after first rotation of the 9-3

In a strong trend buy the candle close over
the 20ema when other criteria have been met

Second divergence get the cheese

The only path to qualification is by taking the right trades and you need to be ready for them when appear. If not you will force yourself to take less quality trades and eventually blow up.

My Goal in the Futures Trade Alert is to make sure you are in front of the computer when these opportunities arise. This is a serious business we are in. You have to be ready when the trade appears
